

# ILOMA AUTOMATIC UMBRELLA

## The seasons highlight!

The electronic umbrella with remote control. It opens and closes at a simple touch of a button - the umbrella closes itself upwards using the proven Handy-Lift technology.

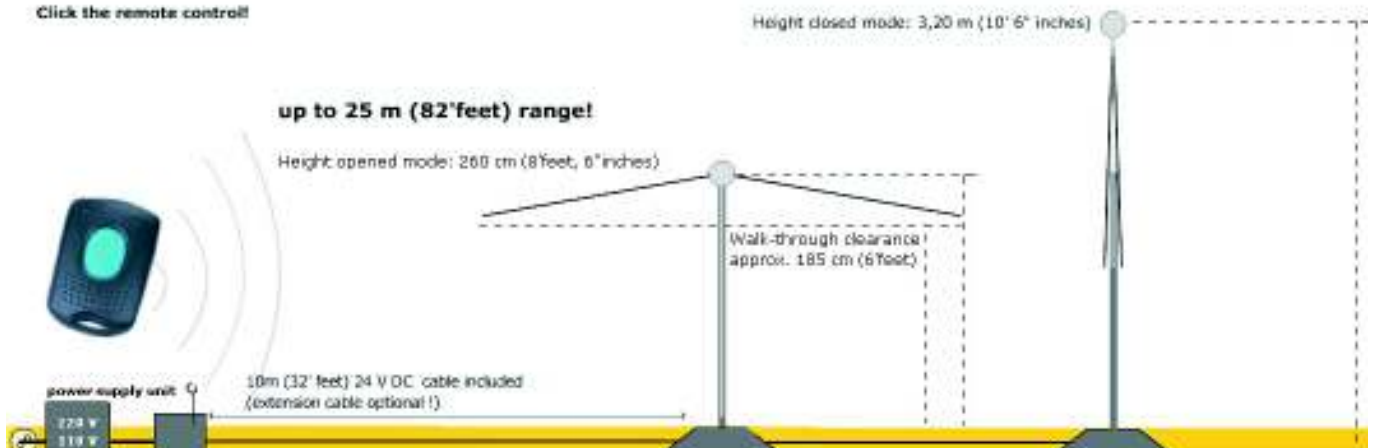

## Serial connection!

The patented ILOMA-serial connection allows you to control any number of automatic umbrellas, certainly a great show your customers will talk about! But it is more than just a gimmick, you are able to open and close the umbrellas without using expensive manpower or disturbing your guests (as well, the umbrellas may of course be controlled separately).
